# Scaling Out With HTC

Your Research

Describe your research in one sentence:

Your List of Tasks

What is the smallest, self-contained computational task that is part of your work?
Does this task have multiple steps? ☐ Yes ☐ No

Describe your work as a list of these tasks:

What do you need to run **one** task?

Time	
Cores	
Memory (RAM)	
How much data?	
Anything else?	

How long is your list? How many tasks do you need to run?

Which of the above is a major bottleneck?
