

Scaling Out With HTC

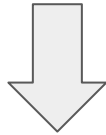

Your Research

Describe your research in one sentence:

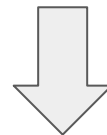

Your List of Tasks

What is a single, self-contained computational task that you need to run?

Is this task part of a larger pipeline? ☐ Yes ☐ No

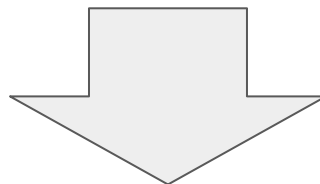

Why does this task need to be run multiple times?

What do you need to run **one** task?

Time	
Cores	
Memory (RAM)	
How much data?	
Anything else?	

How many tasks do you need to run?

Which of the above is a major bottleneck?
